

MBF

INSPECTION SERVICES, INC.

To set the standard for safety, environmental and inspection services through the provision of quality service from the most experienced, highly qualified personnel in the oil and gas industry.

Providing competent, quality, third party inspection services since 1992.

About Us:

At MBF we strive to provide the highest quality in inspection services while promoting strong safety awareness to our clients and their projects. MBF's management believes that we must continually improve ourselves to keep abreast of the industry standards, technical innovations, and regulatory requirements. MBF's commitment to quality and superior service provides our customers with well-trained and qualified personnel whose commitment to job safety and quality of work mirror the needs and requirements of the client. Through partnering with our client, we can achieve safety, compliance, quality, and cost effectiveness.

MBF provides project owners with quality Inspection Professionals:

Our employees are our #1 asset.

Safety:

MBF Inspection Services places the safety of our employees and client as our highest importance. MBF’s safety program has been reviewed and is monitored by numerous third party organizations including National Compliance Management Services (NCMS), ISNetwork, and Veriforce to insure MBF’s safety program meets or exceeds all regulatory and client requirements.

MBF’s has a mandatory safety program that includes initial orientation, annual refreshers and client or project specific training as required by the client. MBF has OSHA Authorized Outreach, PEC SafeLand/SafeGulf, H2Sclear, and First Aid / CPR-AED instructors on staff.

Compliance:

DOT Operator Qualifications:
MBF Inspection Services currently conducts Operator Qualifications in accordance with DOT requirements and works with each client to determine specific qualification requirements for each project. MBF is able to provide qualifications through Energy Worldnet (EWN), National Center for Construction Education and Research (NCCER), Operator Qualification Solution Group (OQSG), and Veriforce as required by client.

Drug and Alcohol Testing:
MBF Inspection Services drug and alcohol program is conducted as mandated by the DOT through the services of Pipeline Testing Consortium. Our written policy is available upon request from MBF Inspection Services Inc., or from Pipeline Testing Consortium. MBF also utilizes DISA, ASAP and Team as required by client.

| Citgo Petroleum | Magellan Midstream | XTO Energy |
| Concho Resources (COG) | Millennium Pipeline | |

In today's world, the oil and gas industry is more regulated than ever. The industry has to ensure that design, construction, and operation of pipelines and facilities from the well head to the refinery are conducted safely and to a rigid standard. Having on site personnel to ensure quality control and safety requirements are met greatly reduces the risks of incidents during construction and failures in the future.
